PROFILE

Adaptable Computer Science graduate with Junior Business Analysis experience and a strong ability to bridge the gap between technical and non-technical teams in software delivery environments. Skilled in system documentation, requirements analysis, JAD session facilitation, and translating complex concepts into practical, technology-driven solutions. Driven by analytical problem-solving, continuous learning, and a passion for building innovative systems that create measurable business impact.

EDUCATION

Tshwane University of Technology 2022 – 2025

Diploma in Computer Science · NQF Level 6 *Pretoria, Gauteng*

Relevant coursework:

- **Business Analysis and Modelling:** Requirements elicitation, BPMN process mapping, use case modelling, stakeholder analysis, and BRD authoring
- **Software Development (Programming):** Java OOP, application design, SDLC methodologies (Agile & Waterfall), API concepts, Git version control
- **Software Testing:** Test planning, test case design, defect lifecycle management, regression testing, UAT coordination
- **Database Development and Administration:** Relational database design, SQL querying, data normalisation, ER modelling, DB2 fundamentals

EXPERIENCE

Mainframe Operations (Work-Integrated Learning) 2024 – 2025

New Island Technologies · A Newtons Training Academy Initiative *Pretoria, Gauteng*

- Applied Computer Science principles to a mainframe integration project, analysing system interactions, data flows, and integration requirements within a live IBM z/OS enterprise environment
- Delivered a final capstone project on SMF (System Management Facility) log analysis, extracting and interpreting mainframe operational data to assess system performance, workload behaviour, and resource utilisation trends
- Mapped integration points and data dependencies between SMF logs and downstream reporting and monitoring processes, supporting end-to-end visibility of enterprise IT operations
- Analysed technical and process-related challenges, contributing to solution discussions by identifying root causes, risks, and improvement opportunities across mainframe operations workflows
- Monitored z/OS mainframe performance and availability using BMC AMI Ops Monitoring; conducted capacity and cost analysis using BMC AMI Ops Capacity & Cost tooling to support infrastructure planning
- Supported mainframe security monitoring, user access reviews, and compliance checks using BMC AMI Ops Security and IBM z/OS RACF fundamentals
- Maintained operational documentation and contributed to internal knowledge-base updates, ensuring accurate records of mainframe configurations, procedures, and incident resolutions

PROJECTS

Banking Onboarding BRD | *Business Analysis · BPMN · Requirements · Use Cases* *2024*

- Produced a full Business Requirements Document, including context diagrams, use case specs, BPMN process maps, and MoSCoW-prioritised requirements for a simulated bank account onboarding system

Software Test Plan & Defect Report | *Test Design · UAT · Defect Management · Reporting* *2023*

- Designed a test plan covering functional and regression testing for a web application; authored 20+ test cases, executed test runs, logged defects, and produced a test summary report with pass/fail analysis

Library Management System — Database | *SQL · ER Modelling · Normalisation · CRUD* *2023*

- Designed a 3NF normalised relational schema with ER diagrams and data dictionary; implemented SQL for CRUD operations, joins, stored procedures, and applied indexing for query optimisation

CERTIFICATIONS

Oracle Certified Associate — Java SE 8 Programmer · IBM: Introduction to z/OS · Architecting Applications on IBM Z · z/OS Network Security
BMC AMI: Ops Monitoring · Ops Security · Ops Capacity & Cost · Ops Storage · Cloud for Partners

TECHNICAL SKILLS

Languages: Java, SQL (Oracle, DB2), Python (basic), HTML, CSS, JavaScript (basic)
BA & Analysis: Requirements gathering, BPMN, use case modelling, stakeholder mapping, gap analysis, user stories, acceptance criteria
Testing: Test case design, defect lifecycle management, UAT coordination, regression testing, test reporting
Enterprise / Mainframe: IBM z/OS, BMC AMI Ops tooling, RACF fundamentals, mainframe performance monitoring, storage & capacity management
Developer Tools: Git, GitHub, VS Code, IntelliJ, Eclipse, Jira, Confluence, Lucidchart, Microsoft Office Suite
